Final newsletter

Greetings from DEEP PPU team!

After three years of collaboration, the Horizon Europe DEEP-PPU project has successfully concluded.

While the project has come to an end, its results and innovations will continue to evolve, as partners build upon them in future developments. We invite you to discover and make use of our knowledge and achievements.

Explore this newsletter to learn more about our journey, milestones, and lasting impact.

Webinars

During the project, we organised three webinars where the consortium shared its progress, technological developments, and main results with a variety of target audiences.

You can still access information, recordings, and presentations from these webinars to learn more about the DEEP-PPU project's outcomes and innovations.

1st webinar Electric Space Propulsion

Electric space propulsion was presented as a key technology for future satellites. DEEP PPU and GIESEPP MP teams shared insights on market needs, power electronics design and system testing. Targeted at students and professionals interested in electric propulsion advancements.

2nd webinar For start-ups and SMEs in space sector

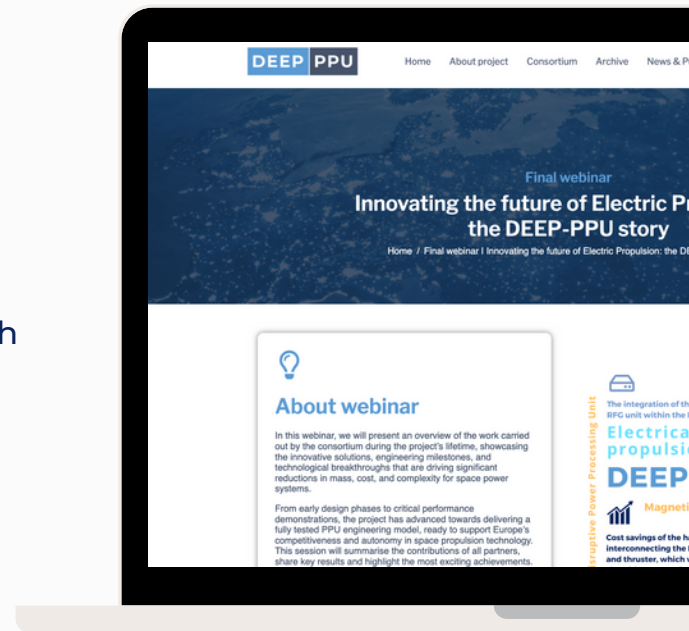

The webinar explained how Horizon Europe creates opportunities for innovative European start-ups and SMEs in the space sector, offering guidance on navigating space collaboration and positioning themselves as strong partners for industry leaders.

3rd - FINAL WEBINAR Innovating the future of Electric Propulsion the DEEP-PPU story

The webinar presented the consortium's key achievements, highlighting innovative solutions and engineering progress that reduce mass, cost and complexity in space power systems. It covered the project's path from early design to a fully tested PPU engineering model, summarising partner contributions, main results and major technological milestones.

Publications, conference papers, presentations

Throughout the project, DEEP-PPU partners actively participated in several international conferences, presenting their work and results through papers, posters, and presentations.

Many of these conference papers and publications are available for you to explore on our website and on Zenodo, showcasing the innovative technologies and advancements achieved within the DEEP-PPU project.

News and updates

In addition to publications and webinars, the DEEP-PPU consortium has also shared regular updates and news throughout the project, all of which are available on our website.

[Read all articles](#)

What makes DEEP-PPU remarkable isn't just the technology we developed — it's the collaboration behind it. We worked as one team, beyond organisational boundaries and different countries, proving that trust and shared purpose can drive innovation further than expected.
